## **Enhancing skills development & networking for emerging Italian producers: TorinoFilmLab launches TFL Up & Coming Italia**

The international laboratory **TorinoFilmLab** is presenting the new initiative **TFL Up & Coming Italia**, specifically designed for emerging Italian producers taking their first steps into international co-production.

TFL Up & Coming Italia will bring together a **group of 6 emerging producers** working on a **feature film project** (fiction or creative documentary), who will be offered an **exclusive plan of activities with TFL experts**, and will then take part in the **co-production forum TFL Meeting Event** in November 2020.

The selected producers – who must have already obtained national and/or international recognition and are taking their first steps into international co-production – will get a unique insight into markets and international financing through a combination of meetings with experts and mentors as well as a series of masterclasses and case studies.

After these first dedicated training sessions, the producers of TFL Up & Coming Italia will join the other guests in the TFL Meeting Event forum, which includes the public presentations of projects developed within TFL, one-to-one meetings and networking moments. It will also be an opportunity to present their project through the *TFL Catalogue* and meet potential international partners.

**All guidelines & full call for applications available here:**
